Programming Assignment

This lecture notebook gives a tutorial on how to use numpy for data science. Numpy makes coding considerably easier in python. This is not needed for the homework, but we recommend reading through it.

[Download this homework](#) and complete HW_10.ipynb.

Error

1 point possible (graded)

What is the correct output for the following code: `Error(50,0.9,15)`

☐ 2.866

☐ 3.204

☐ 3.489

☐ 4.387

Submit

You have used 0 of 2 attempts

Confidence

1 point possible (graded)

What is the correct output for the following code:

```
Confidence(50,6,25)
```

☐ 0.910

☐ 0.842

☐ 1.443

☐ 0.874

Submit
